## Annual Average 1975

---

U.S. Department of Labor  
Raymond J. Donovan, Secretary

Bureau of Labor Statistics  
Janet L. Norwood, Commissioner

September 1982

## Preface

The data contained in this report represent the complete count of employment and wages for workers covered by unemployment insurance (UI) programs during 1975. The data are collected and organized by industry by the State employment security agencies from reports filed by employers. The Bureau of Labor Statistics compiles data on a nationwide basis, by State, and by industry.

Detailed data on covered employment and wages in both the private and government sectors are prepared by many State agencies for use in their own

programs. These include data by county and for local labor market areas and are available upon direct request to the State agency at the address listed at the end of this publication. Material in this publication is in the public domain and may, with appropriate credit, be reproduced without permission.

This report was prepared in the Division of Occupational and Administrative Statistics in collaboration with the Division of Special Publications. Data were processed in the Division of Federal/State Periodic Surveys.

This publication presents 1975 data on employment and wages based on the 1972 Standard Industrial Classification. The data relate to workers covered by State unemployment insurance laws and Federal civilian workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. Table A-1 excludes data for Puerto Rico. All other tables include these data. The data for both private and Federal workers are reported to BLS by the employment security agencies of the 50 States, the District of Columbia, and Puerto Rico. In 1975, for the Virgin Islands, only employment and wage data for Federal workers were reported.

During 1975, over 3.9 million reporting units of employers in private industry were subject to State unemployment insurance laws. These employers submitted to State agencies quarterly tax reports on monthly employment and quarterly total and taxable wages and contributions. Similarly, reports of monthly employment and quarterly wages were submitted by approximately 32,000 reporting units of the Federal Government. These reports, summarized each quarter by State agencies, provide a virtual census of workers (and their wages) in private nonagricultural industry and the Federal Government. In addition, over 81 percent of State government employees, 20 percent of local government employees, and 5 percent of agriculture production workers were in covered employment.

A description of the nature and limitations of these data appears in the technical note following the tables.

## Categories of data shown

For all covered employment, this publication contains employment and wages, reporting units and average weekly wages at the national level for 11 broad industry divisions (one-digit), 84 major industry groups (two-digit), and all industry groups (three-digit). At the State level, data are distributed at the two-digit level.

Data for Federal workers are summarized in industry detail at the national level. In addition, for the largest Federal agencies, the data are summarized by type of agency.

## Unemployment insurance laws

Provisions of the Federal Unemployment Insurance Tax Act became effective in January 1938. They applied only to firms employing at least eight persons in 20 weeks in a calendar year and excluded

certain categories of workers. (See section on "Nature, Sources, Uses, and Limitations of the Data" following the tabular material.) Amendments to Title XV of the Social Security Act--The Program of Unemployment Compensation for Federal Employees--extended coverage to Federal civilian employees effective January 1, 1955, and to workers in firms employing from four to seven workers effective January 1, 1958.

On January 1, 1958, the Unemployment Compensation for Ex-servicemen (UCX) program became effective, bringing under coverage a significant portion of men and women who had served in the Armed Forces. (The programs for ex-servicemen which existed prior to 1958 were of a temporary nature.)

Over the years, many States have, through changes in State legislation, provided unemployment insurance protection to additional categories of workers above the base established through Federal legislation.

Federal legislation effective January 1, 1972, extended coverage of State unemployment insurance systems in 28 States to firms employing one or more workers and expanded some of the statutory coverage provisions. The remaining States had already expanded coverage for these small employers prior to the passage of the Federal minimum requirement. These amendments, as well as additional changes in State legislation, broadened the base of workers protected by unemployment insurance to more than three-fourths of all workers.

Special provisions for railroad workers are made through the Railroad Unemployment Insurance Act. The data reported for the UCX and Railroad Retirement Board programs are included in the total covered employment in this publication.

1/ SOURCE: Table A-1, Employment and Earnings, August 1975, Vol. 22, No. 2 and January 1976, Vol. 22, No. 7, total labor force minus civilian labor force plus total employed.

2/ Sum of items shown separately under "Covered employment by program".

3/ SOURCE: Table B-1, Employment and Earnings, January, 1976, Vol. 22, No. 7.

4/ SOURCE: State employment security agencies. Includes sum of items shown separately under "Covered employment by program" except for the program for ex-servicemen (UCX). Excludes covered agricultural and domestic workers and covered employees of Puerto Rico.

5/ SOURCE: Table A-1, Employment and Earnings, see footnote 1.

6/ SOURCE: Employment and Training Administration; weekly average of insured unemployment under State, Federal employees' and ex-servicemen's programs, and that covered by the Railroad Unemployment Insurance Act. Monthly data relate to week including the 12th.

7/ SOURCE: State employment security agencies. Excludes Puerto Rico.

8/ SOURCE: State employment security agencies except for data from January 1955 through September 1956 (Bureau of Labor Statistics). Excludes Puerto Rico.

9/ SOURCE: Department of Defense; members of Armed Forces covered by the Ex-servicemen's Unemployment Compensation Act of 1958 (UCX) from October 1958 forward, and by predecessor programs from 1944 through 1958.

10/ SOURCE: Railroad Retirement Board.

11/ Excludes State and local government units covered in 1955-58. Federal government units are excluded all years (approximately 34,000 in 1945). Quarterly totals are used for the detailed 1975 data in this table. Excludes Puerto Rico.

12/ SOURCE: State employment security agencies; average weekly wage is computed by dividing total annual payroll by average annual employment by the 52 weeks in a year. For the detailed 1975 data in this table, average weekly wage is computed by dividing total quarterly payroll by average monthly employment for the quarter and by 13 weeks in a quarter. Excludes Puerto Rico.

13/ Six-month average, July-December 1938.

14/ Data on insured unemployed include 1.5 million ex-servicemen who are not included among total unemployed.

15/ Beginning in 1947, total employed and unemployed exclude workers under 16 years of age. Prior data include 14- and 15-year-olds. Covered employment refers to all workers regardless of age.

1/ Workers on the Federal payroll for pay periods including the 12th of the month. (Exception: Employment count for Department of Defense installations is the number of persons on the payroll at the end of the month plus all intermittent employment during the month).

2/ Includes other selected defense agencies in addition to Army, Navy, and Air Force.

- Data not reported.

NOTE: Detail may not add to total due to rounding.

# Nature, Sources, Uses, and Limitations of the Data

## Nature and Sources

The data in Employment and Wages are compiled from the quarterly tax reports submitted to State employment security agencies by employers subject to State unemployment insurance (UI) laws and Federal installations subject to the Unemployment Compensation for Federal Employees (UCFE) program. State employment security agencies compile the data for their States which are then summarized for the Nation by the Bureau of Labor Statistics. (For a list of these agencies, see the last page of this publication.)

### Employment

Private industry. The employment data, as reported quarterly by employers in private industry, represent the number of workers earning wages during the pay period including the 12th of the month. The pay period will vary in both date and length from employer to employer. For most employers, the payroll period is a 7-day period, not necessarily a calendar week. An employer who pays on more than one basis (such as production employees weekly and office employees semimonthly) reports a figure that is the sum of the number of workers on each type of payroll for the appropriate period.

The count of workers in private industry includes all corporation officials, executives, supervisory personnel, clerical workers, wage earners, persons on paid vacations, piece workers, and part-time workers. Since the employment count is based on individual establishments, the workers are reported as working in the State of the physical location of their job.

Persons on paid sick leave, paid holiday, paid vacation, and so forth, are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Workers are counted even though, in the latter months of the year, their wages may not be subject to the unemployment insurance tax. The employment count excludes the following: (1) Workers who earned no wages during the entire applicable pay period because of work stoppages, temporary layoffs, illness, or unpaid vacations; (2) workers who earned wages during the month but not during the applicable pay period; and (3) proprietors, the self-employed, unpaid family workers, some farm workers, and some domestics in private households.

State and local government employees. Federal legislation which became effective in 1975 required States to cover employees in State-owned and -operated hospitals and State institutions of higher education. (Details on coverage laws are provided in Comparisons of State Unemployment Insurance Laws available on request from the Employment and Training Administration of the U.S. Department of Labor.)

Federal employees. Employment data reported for Federal civilian employees are a byproduct of the operations of State employment security agencies in administering the provisions of title XV of the Social Security Act--the program of Unemployment Compensation for Federal Employees.

In government, the equivalent of a reporting unit is an "installation" (a single physical location) and the equivalent of an employer or firm is the organization of which the installation is a part, i.e., the department, agency, or instrumentality responsible for an activity of government.

The data are based on reports of monthly employment and quarterly wages submitted each quarter to State agencies for all installations of Federal agencies having employees covered by the act, except the Central Intelligence Agency and the National Security Agency, which are omitted for security reasons.

The Department of Defense (except for employees paid from nonappropriated funds) submits these data under a special arrangement. In lieu of quarterly reports, installations of the Departments of the Army, Navy, Air Force, and other Defense units submit monthly reports to the State agencies for each installation with 101 employees or more. Quarterly data for all installations, including those with fewer than 101 employees, are reported directly to the BLS which then transmits the figures to the States for inclusion in the Department of Defense totals.

The Federal agencies currently report data separately by installation, except where they exercise the option to combine small installations into a single "statewide" report. Installation reporting permits grouping the data by political subdivision below the State level, i.e., county, metropolitan area, etc.

The employment count for any given month for all agencies (except the Department of Defense) is based on the number of persons on the payroll for the period including the 12th of the month. The employment count in installations of the Department of Defense includes persons employed on the last workday of the month plus all intermittent employees during the month. Intermittent workers are occasional workers who were employed at any time during the month.

Comparison of UI employment data with other series

County Business Patterns data. The differences between UI-covered employment and employment covered by the Federal Insurance Contributions Act (Social Security) as published in County Business

Patterns are due primarily to (1) provisions in a number of State UI laws requiring the minimum amount of time of employment and/or amount of payroll, or excluding selected groups from UI coverage; (2) differences in industrial classification that arise because of differences in what constitutes the reporting unit and in the treatment of central administrative offices and auxiliary units; (3) differences in coverage of nonprofit organizations; (4) other factors, such as differences in reports submitted by employers to Federal and State agencies and differences in methods of processing and adjusting the data.

Employment data in the economic censuses. For complete censuses, such as the Census of Manufactures, the Census of Mineral Industries, and the Census of Business, the information is obtained from establishments, and the concepts of employment for industries in the scope of the censuses are similar to those in the UI reports. Employment totals, however, will still differ due to (1) exclusions from UI coverage, (2) differences in industrial classification, particularly of central administrative offices and auxiliary units, and (3) differences in pay periods to which the data relate; for example, employment data for the most recent censuses for retail trade, wholesale trade, selected services, and public warehouses represent counts for the pay period including March 12. For manufacturing and mineral industries, employment represents an average of all production workers on the payroll during the pay periods including the 12th of March, May, August, and November plus all other employees on the payroll during the pay period including March 12. Employment for the construction industry represents estimates of the average number of employees on the payroll for the pay periods including the 12th of March, May, August, and November.

Current Population Survey. The UI-covered count of both private and government employment contains some duplication resulting from workers who appear on two payrolls because they have changed jobs or worked at two or more jobs simultaneously during the reporting payroll period. Such workers are counted only once for the Current Population Survey (information obtained from a sample of households), which classifies the workers according to the job at which they worked the greatest number of hours in the survey week. CPS figures on total civilian employment also differ from payroll count figures in that they include farm workers, self-employed persons, domestics, and unpaid family workers who worked 15 or more hours in the survey week, etc. The UI-covered count does not include as employed certain persons "with a job but not at work" --those persons who earned no wages during the pay period because they were temporarily absent from their jobs due to unpaid vacations, time off, illness, industrial disputes, or bad weather. Such persons are counted as employed by the household survey if they were not looking for work during the survey week. The UI series includes all employees in covered employment. In 1946 and earlier years persons under 14 years of age were excluded from the CPS labor force statistics. After 1946 persons under 16 are excluded.

Current Employment Statistics program. The BLS, the Employment and Training Administration, and in 49 States and the District of

Columbia, State employment security agencies cooperate in the operation of the Current Employment Statistics (CES) program. In the remaining State, the program is operated by another State agency in cooperation with BLS. In the CES program, the State agencies have responsibility for the preparation of current employment estimates for the State and for the major labor market areas in the State, while the BLS has responsibility for monthly national estimates. The CES estimates by industry for the Nation and States are benchmarked annually to the UI-covered employment data supplemented by data on employment not covered by UI obtained from various sources, including County Business Patterns. The current estimates of employment average weekly and hourly earnings, and average weekly hours are derived from payroll reports submitted by a sample of 162,000 establishments.

Office of Personnel Management data. The Office of Personnel Management (OPM) publishes a statistical series on Federal employment and payrolls which provides information on employing agencies, types of positions and appointments, and characteristics of employees. Federal employment data covered by UCFE provide industry and local area detail not available in the OPM series, including an actual count of monthly employment by State. In the OPM series, employment by State is available only for December of each year. Both the UCFE and OPM count of the employed exclude: (1) Members of the Armed Forces, (2) temporary emergency workers in case of fire, flood, earthquake, etc., and (3) officers and crew members of American vessels (a) owned or chartered by the United States, and (b) whose business is conducted by a general agent of the Secretary of Commerce, if there is liability for the payment of payroll taxes to an unemployment compensation fund under a State UI law.

Certain Federal workers are in the UCFE count who are not in the OPM count and vice versa. For example, included in the UCFE count but excluded from the OPM count are Defense Department workers paid from nonappropriated funds, employees of county agricultural stabilization and conservation committees, State and area marketing committees, and the Agricultural Extension Service. Excluded from the UCFE count but included in the OPM count are workers employed outside the United States and its territories, workers paid on a contract or fee basis, paid patients or inmates of Federal homes, hospitals, or institutions, and certain interns, nurses, and student employees of Federal hospitals. The UCFE employment count relates to the payroll period including the 12th of the month whereas the OPM count represents the number of persons employed on the last workday of the month plus all intermittent employees during the month.

#### Wages

Total wages. Total wages, as reported on the quarterly contribution reports of employers covered by State UI laws, are, in most States, the total amount of compensation paid by the employer during the quarter for services performed, whether or not they were performed during the calendar quarter. A few State laws specify that the wages reported shall be on a payable basis, i.e., for services

performed during the quarter. Under most State laws or regulations, wages include bonuses, the cash value of meals and lodging when supplied, and tips and other gratuities.

Employer contributions for old-age, survivors, disability, and health insurance (OASDHI), unemployment insurance, workers' compensation, and private pension and welfare funds are not reported as wages. On the other hand, employee contributions for the same purposes, as well as money withheld for income taxes, union dues, etc., are reported even though they are deducted from the worker's gross pay.

Wages of Federal workers represent the gross amount of all payrolls for all pay periods ending within the quarter, including cash allowances, the cash equivalent of any type of remuneration, and all payments for sick leave, lump-sum payments for terminal leave, withholding taxes, and civil service retirement deductions. Federal employee remuneration generally covers the same types of services as those for workers in private industry. Depending on the method used by the Federal agency in preparing its quarterly summary balance (cash or accrual basis), the gross amount of payrolls is either paid or payable.

Taxable wages and contributions. Taxable wages, which are that part of wages subject to the State UI tax, and the contributions paid on such wages are also reported quarterly. State law, which has varied substantially over time, determines the portion of wages subject to taxation. In 1975, in all but nine States, an employer paid contributions on only the first \$4,200 of an employer's annual wage. The limit was \$4,300 in Minnesota, Montana and Rhode Island; \$5,000, in Oregon; \$5,400 in Michigan; \$5,000 in California, \$6,600 in Washington, \$6,800 in Hawaii and \$10,000 in Alaska. In 25 States, employers could obtain lower tax rates by making voluntary contributions to the unemployment fund. Alabama, Alaska, and New Jersey also, accepted contributions from employers. Such contributions were included without separate identification.

#### Industrial classification

Employment and wage data have been classified by industry beginning with 1938. The objective in industry classification is to have each place of business coded on the basis of its principal activity. If a firm in private industry or a government agency conducts different activities at its various establishments or installations, separate industry codes are assigned to the extent possible to each activity. Industry codes are assigned by State agencies to each reportable establishment or installation based on "nature-of-business" information employers submit.

Data for 1975 are classified into 1004 four-digit industries, 420 three-digit, and 84 two-digit industry groups classified according to the Standard Industrial Classification Manual, 1972 edition. Employment and wage reports submitted by most State agencies carry industry detail to the four-digit level.

### Classification by employment size

For the first quarter of each year from 1959 to 1974, with the exception of 1964-66, tabulations showing employment and wage data by employment size are included. Reporting units are, for the most part, individual establishments. An establishment is generally defined as a single physical location at which one, or predominantly one, type of economic activity is carried on. Most employers covered under the State UI laws operate only one place of business. In such instances, the establishment, the reporting units, and the employer are identical. Employers who operate at two or more locations and have employment of more than 50 workers in all their secondary locations combined are requested by the State agencies to identify separately the employment and payrolls of each location. To the extent that State agencies have been successful in obtaining employer cooperation in this regard, the reporting units and establishments of such employers are identical. When multiestablishment employers do not furnish this breakdown, the employment and payrolls for the secondary locations are combined and reported with the primary location as one reporting unit. Also, particularly in industries characterized by small branch establishments (e.g., food stores, drug stores, banks), employers are allowed to group all branch establishments in a single county and report the combination as a single reporting unit.

As the result of these procedures, the number of reporting units is always larger than the number of employers (or government agencies) but is smaller than the number of establishments (or installations).

Nine employment size intervals are used. Subject only to the limitations of industry coverage, all but one of these class intervals represent the actual business population in the given size classes. All employers in the "0-3 employees" group are not represented because in some States nonprofit organizations with under four employees are not required to be covered. In almost all of these States, however, employers can voluntarily participate in the State unemployment insurance program and the data from these firms are included in the tabulations.

### Uses of the Data

Private employer contribution reports and government reports provide data necessary for administering State UI programs. Private industry employment data reflect the extent of coverage, and the corresponding wage data provide a basis for estimating the future flow of income into State UI funds. The revenue for these funds is derived from a tax on payrolls of covered private employers. Actuarial studies and evaluation of the financial solvency of State UI funds must take into account employment and payroll fluctuations, and the State's industrial composition.

Listings of private employers and government agencies frequently are used for sample selection and provide control totals for research on: (a) the occupational patterns in labor areas, (b) the place of work and place of residence of workers, and (c) special studies of other facets of labor. Many of the State employment security agencies

regularly tabulate and publish covered private industry and Federal employment and wage data by county and some also by employment size interval. Such detailed employment data are not available from any other source at regular and frequent intervals. Inquiries concerning county data should be directed to the State agencies at the addresses listed at the back of this publication.

Data in this publication represent the largest universe of annual employment and wage information by industry and State regularly available. In addition to their basic uses in administering the UI laws, these data have broad economic significance in evaluating labor trends and major industry developments, both for the Nation as a whole and for individual States. In addition, they are basic source material for many economic series.

National income. The Bureau of Economic Analysis, Department of Commerce, uses the wage data as the major component in its estimates of wage and salary income in the national income accounts. In addition, the data are used in the national income accounts to estimate that part of wage and salary supplement accounted for by employer contributions to State funds, as well as the Federal employer taxes paid for old-age and survivors insurance purposes.

Current employment statistics estimates. Since 1939, the basic source of benchmark information for "all employees" in the Current Employment Statistics program by industry has been UI-covered employment data for private industry and, beginning with 1959, by size of establishment. In 1972, UI data accounted for about 86 percent of the total benchmark. In 1975, the data accounted for 88 percent of the total benchmark. The notable exceptions were private elementary and secondary schools, religious organizations, and State and local government.

For purposes of this report, employed covered workers and covered jobs are considered synonymous because of the close approximation of jobs and employed workers in the employment counts. The employment figures overstate to some extent the number of individuals who were at work and receiving pay during the week including the 12th of the month. Contributing to the overstatement are the dual or multiple job-holders --those workers appearing on more than one payroll for the same period. The overstatement due to multiple jobholding is to a large degree offset by the underreporting of workers due to turnover and unpaid absences occurring in weeks other than the one being measured.

Average wages. Data on wages and average employment of both private and Federal workers are used for calculating, with reasonable accuracy, average weekly wages of covered workers. The average weekly wage is computed by dividing total wages for the year by 52 to derive a figure on wages paid during the average week of the year, which is then divided by the corresponding figure on average monthly employment. Similarly, quarterly wages are divided by 13 and then by average quarterly employment. Average annual wages are computed by dividing total wages by average monthly employment. This procedure assumes that "average monthly employment" is approximately the same in

an average week, an assumption justified by the fact that the pay periods for which employment is reported are in most cases single weeks. Caution should be exercised in using these average weekly wages, particularly those developed from quarterly total wages. The wage data for quarters may be affected by strikes, bonus payments (usually in the October-December quarter), retroactive payments, the influx of young summertime workers in the July-September quarter, and the number of payroll periods within each calendar quarter.

The average weekly wage per covered worker computed by the above procedure should be used carefully since such averages would be understated due to the effects of labor turnover, short-time jobs, etc. The number of different workers employed at one time or another during an entire quarter or year, and hence sharing in the wages paid for the quarter or year, is substantially larger than the average number counted as employed in the pay periods including the 12th of each month of the quarter or year. More extensive data on annual per capita earnings of workers can be obtained from special studies prepared by some State employment security agencies from their employee wage record files.

#### Limitations of the Data

##### Disclosure restrictions

In accordance with BLS policy, data provided to the Bureau in confidence are not published and are used only for specified statistical purposes. BLS scrutinizes the data to preserve the anonymity of establishments. BLS withholds publication of employment and wage data for any industry level (1) which consists of fewer than three reporting units; and (2) in which a single unit accounts for 30 percent or more of the industry's employment. A State may also request that data be withheld for any industry level for which the above criteria would not protect the identity of cooperating employers. Nondisclosable data suppressed within the detailed tables are included in the totals for all industry levels for the States and the Nation.

##### Differences in coverage

Comparisons between one State and another should take into consideration the differences in laws between States. When UI-covered private industry employment data are compared directly with other employment series, the industry exclusions should be taken into account. Excluded from coverage in 1975 were approximately 1.3 million agricultural workers, 1.7 million self-employed farmers, 5.7 million self-employed nonagricultural workers, 1.4 million domestic workers, and 0.9 million unpaid family workers.

In addition, 7.8 million State and local government workers were not protected by unemployment compensation laws. Also excluded from industry detail tables in this publication were 2.1 million members of the Armed Forces and 0.5 million workers (see table A-1) covered by the railroad unemployment insurance system.

#### Agricultural Data

Data shown for agriculture are not complete. Only small segments of agricultural industries were covered by the State UI and Federal employee programs. The data are shown here separately so that persons wishing to add estimates of total agricultural employment obtained from other sources to the employment shown on several of these tables may eliminate duplication by first subtracting the agricultural employment covered by the State UI and Federal employee programs.

#### Estimated Data

To reduce the effect of the exclusion of data because of late reporting by private employers and government installations, estimates of employment and wages for such employers and installations were made by the State agencies and included in each quarterly report. Estimates were prepared for the individual reporting unit based on data reported for the preceding quarter and trends in employment reported by employers and installations in the same industry. Information obtained from other sources was also used.
